Can you make your own line, placing coins or notes in order?

Diving into Mastery – Deepest Adult Guidance with Question Prompts

This activity will help children to compare the value of coins and notes.

What coins has Ravi been given?

How much does he have in total?

Did Anita get more or less than Ravi?

Which note could Anita have been given? How do you know?

If Anita had been given more money than Ravi, which note could she have been given?

Is there another possibility?

Ordering Money

Anita and Ravi get some pocket money.

Ravi gets the most. He has this much:

Anita gets less. She is given a note. What note has she been given? Prove it!

Which coins could she have been given that would have been less than Ravi's pocket money?

The next week, Anita gets more than Ravi. Which note could she have been given? Is there more than one possibility?
